Rules for radio frequencies in messages
1. Read each digit individually: example 43 is read as *"Four Three"*, not forty-three
2. Record and count each frequency in one word box
3. When reading a frequency, lead it with *"mixed group figures"*
4. Replace the decimal point with the letter "R" and read as "*Romeo*"

Example for frequency 145.43
It is written in one box as 145R43 and read as *"mixed group figures* One Four Five Romeo Four Three"
